

Serge Rey is Professor of Geography at the San Diego State University where he teaches courses in spatial data analysis, regional modeling, economic geography and geographical computing. His research interests are in the areas of open source geocomputation, regional growth and inequalities, spatial econometrics and integrated multiregional modeling. Rey has received research funding from the U.S. Environmental Protection Agency, National Science Foundation and the California Employment Development Department, and other public agencies. Rey is Editor of the *International Regional Science Review* and serves on the editorial boards of *Geographical Analysis* and *Papers in Regional Science*. He obtained his Ph.D. in Geography from the University of California, Santa Barbara.
